**DETAILED ACTION**

***Allowable Subject Matter***

1. The following is a statement of reasons for the indication of allowable subject matter:
2. For claims 1-23, the prior art of record does not disclose or suggest the claimed method of controlling a process for generating hydrogen including a) generating hydrogen at a rate within a first rate range sufficient to accommodate hydrogen in a reservoir, b) upon a predetermined first amount of hydrogen being accumulated in the reservoir, changing the rate of hydrogen generation to a rate within a second range insufficient to maintain the first amount of hydrogen in the reservoir, and c) upon a predetermined second amount of hydrogen being in the reservoir, said second amount being less than the first amount, changing the rate of hydrogen generation to a rate within the first rate range.
3. For claims 24-29, the prior art of record does not disclose or suggest the claimed method of controlling a process for generating hydrogen including changing the rate of hydrogen production from a first rate to a second rate and maintaining a substantially constant pressure swing cycle time for the adsorption at each such rate and varying the purity of the purified hydrogen stream.
